NIS Minutes

PREPARATION OF NIS #S45

It was decided at NIS Committee Meeting No. 22, 15 February 1949, that NIS S45 "will be a special study with Chapter I-type treatment".

This does not imply that there will be any condensation of material such as would be done for sections of orthodox Chapters I. All pertinent material available should be presented in each section, just as though the section were an orthodox chapter.

The implications are as follows:

1. Chapters will be placed in section form and sections of the chapter will become subsections of the sections. For example, Chapter II becomes Section 11 and takes the following format:

- "Section 11. Military Geography
 - "A. General (corresponds to 'Introduction')
 - "B. Oceanography
 - "1. General (if desired)
 - "2. Tides and currents
 - "3. Sea and swell
 - "4. Sea-water characteristics
 - "5. Bottom Sediments and Topography
 - "6. Algae and Bioluminescence
 - "7. Comments on Principal Sources
 - "C. Coast and Landing Beaches, etc."

2. When other sections have been prepared, the Chapter I Subcommittee will prepare a Chapter I-style Section 10.
